### Revised Estimates

As mentioned in previous issues of this publication, the civilian employees series has been undergoing an extensive revision. The figures contained in this issue are based on revised benchmarks and other data and are not compatible with figures contained in issues of *Civilian Employees* (6212.0 and 6213.0) before July 1979. The revisions were made on the basis of data from the 1971 and 1976 population censuses, labour force surveys, economic censuses and surveys, payroll tax returns, returns from government bodies and other employment returns. More detailed estimates and an explanation of the methods used to revise them will be published in the July 1979 issue of *Civilian Employees, Australia*, (6213.0), to be released shortly. The complete series of revised estimates for the period June 1971 to June 1979, plus a corresponding series of main aggregates for the period June 1966 to May 1971, based on revised 1966 and 1971 benchmarks, will be issued in a long-term publication entitled *Civilian Employees, Australia, June 1966 to June 1979* (6214.0), which is expected to be available in February 1980.

### MAIN FEATURES

**NOTE.** The figures below refer only to civilian wage and salary earners excluding those in agriculture and private domestic service.

- Employment increased by 6,700 persons in August 1979 (+14,200 seasonally adjusted) and by 10,000 in September (+12,200 seasonally adjusted).
- Private employment increased by 6,100 in August and 9,900 in September. Government employment increased by 600 in August and remained unchanged in September.
- The principal increases during the two-month period were recorded in:

wholesale and retail trade 5,300

manufacturing 4,100

mining 3,200 (mainly due to recovery from an industrial dispute)

entertainment, recreation, restaurants, hotels and personal services 3,000

community services 2,500

while employment in construction decreased by 1,400.

### Scope of estimates

2. The series in this statement relate only to wage and salary earners, not the total labour force. The statistics therefore exclude employers, self-employed persons, unpaid helpers and the unemployed. Employees in agriculture and private households are also excluded because of the inadequacy of current data.

3. Persons who are on paid leave or who work during part of the pay-period and are unemployed or on strike during the rest of the period are generally counted as employed. Those not shown on employers' payrolls because they are on leave without pay, on strike or stood down for the entire period are excluded.

### Method of estimation

4. The estimates are based on benchmarks derived from the results of the 1971 and 1976 population censuses, labour force surveys and other relevant sources, such as special returns from government bodies and the Bureau's economic censuses and surveys. Month-to-month changes shown by current returns are linked to the benchmark data to derive the monthly estimates. Current returns are of three main types :

- payroll tax returns
- returns from government bodies
- other current employment returns (e.g. for hospitals).

5. At July 1979 recorded employment obtained from these sources is estimated to have accounted for nearly 85 per cent of the total number of employees in the industries covered. The balance (that is, unrecorded private employment) is estimated.

### EXPLANATORY NOTES

#### Reference period

Current data supplied by reporting enterprises or establishments generally refer to persons on the payroll for the last pay-period in each month.

## Government employment

6. Government employees comprise not only administrative employees but also all other employees of government bodies (Australian, State, local and semi-government) on services such as railways, road transport, banks, postal and telecommunications, air transport, education (including universities, colleges of advanced education, etc.), radio, television, police, public works, factories, marketing authorities, public hospitals (other than those run by charitable or religious organisations) and departmental hospitals and institutions.

## Related publications

7. Users may also wish to refer to the following employment publications which will be released shortly.

*Civilian Employees, Australia, July 1979* (6213.0)  
*Civilian Employees, Australia, June 1966 to June 1979* (6214.0)

All current publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

8. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
